AI FOUNDATIONS · FINAL PROJECT

Sunday League Fair Draw

Fair teams. Fresh pairings. Verified by code.

TA Tarish Abubakar

THE PROBLEM

Same teams, every Sunday.

- **Picking teams takes time**
- **Arguments about fairness**
- **Same pairs, week after week**

DEMO FACTS
4 players · captains picked in turns · team balance was the main frustration
evidence/league_night.json

Illustration: the same pair is teammates again and again.

WHAT IS NEW

Memory plus proof.

Remembers

Past teammates count, so pairs rotate.

Published seed

Anyone can re-run the draw.

Verified

Same inputs, same teams. Code checks it.

HOW IT COMPARES

TO ADD

Add one verified team-balancer app and what it does

`evidence/competitors.md`

HOW IT WORKS

AI reads. Code decides.

THE APP

From chat to teams.

Add screenshot

attendance_proposal.png

1 **Attendance proposal**

Add screenshot

draw_pitch.png

2 **The draw on the pitch**

Add screenshot

fairness_cards.png

3 **Fairness checks**

COST TO RUN

The draw costs nothing.

0

tokens used by the draw engine

The draw is plain code.

2

AI steps per night

Read the chat, write the message.

8

calls max per run

A 20-call test run was stopped by this limit.

TO ADD

Tokens per night (input, cached, output)

`results/token_runs.json`

TO ADD

Cost per league per month

`results/scale_costs.md`

TO ADD

At 100 and 10,000 leagues

`results/scale_costs.md`

SAFETY

We tried to break it.

Attacks
Chat is data. Only your own claim counts.

0 injection changes

0 wrong auto-applied claims

Malfunctions
Bad or invented output is dropped.

0 unknown names accepted

Overspending
Hard call limits per run and per day.

20-call run stopped at 8

Add screenshot

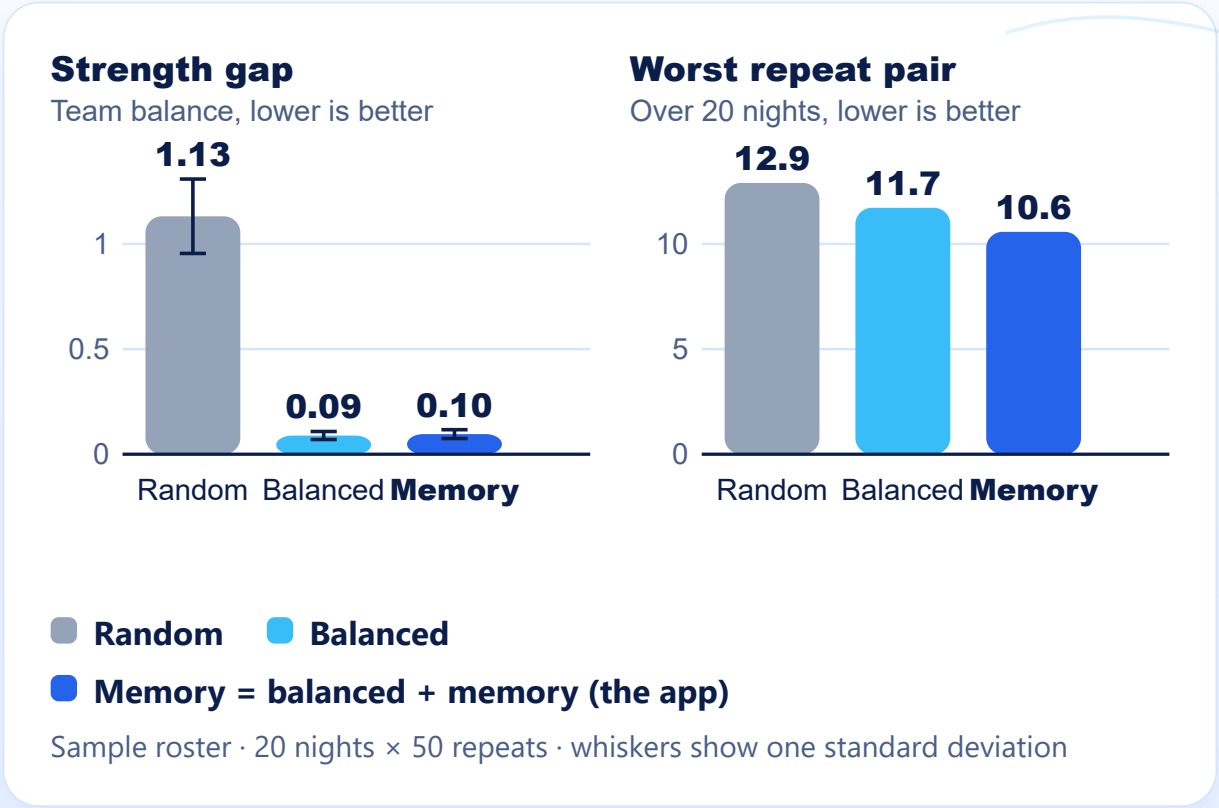

`defense_log.png`

1 **An attack, blocked**

Sunday League Fair Draw

IMPACT · SIMULATION

Balanced teams, fewer repeat pairings.

12×
smaller gap than random

−18%
worst repeat vs random

Top two together: about 56% in every method

DEMO FACTS
4 players · 26 minutes with the app · 2 redraws · fairness ratings: 1/5 each · all selected “more” trust evidence/league_night.json

Sunday League Fair Draw

WHAT WORKS · WHAT'S NEXT

Honest results.

Working

- Average team gap about 0.1
- Draw re-checked from its seed
- Hostile messages blocked

AI reading the chat

5 labeled runs

Precision

Recall

Attendance accuracy

It misses many claims. This is the next fix.

→ Fix attendance reading

→ Run the token study

→ Test on a real league night

THANK YOU

Fair teams. Clear proof.
